*“An adventure 65 million years in the making”*

(Kingston, NY) The Bardavon presents on UPAC's big screen the classic science fiction adventure film: ***Jurassic Park (1993) on Friday, November 2 at 7:30PM.***

In the 1993 classic, industrialist, bioengineer and billionaire Jon Hammond (Richard Attenborough) establishes a theme park which features cloned dinosaurs called Jurassic Park. Following an incident resulting in the death of a dinosaur handler, Jon Hammond invites a select group of people to help calm the anxious investors to prove that the park is safe and ready to be open to the public.

The group includes paleontologist Dr. Alan Grant (Sam Neill), paleo botanist Dr. Ellie Sattler (Laura Dern), mathematician/theorist Dr. Ian Malcolm (Jeff Goldblum) and Jon's own grandkids Lex Murphy (Ariana Richards) and Tim Murphy (Joseph Mazzello). All seems well until the park's lead computer programmer Dennis Nedry (Wayne Knight) is bribed by one of Jon Hammond's rivals. Nedry thus deactivates the park's security system and all hell breaks loose.
